

Installer - Refactor #28906

Make cdn_ssl_version a Setting

01/31/2020 03:15 PM - Chris Roberts

Status:	Closed	
Priority:	Normal	
Assignee:	Chris Roberts	
Category:	Foreman modules	
Target version:		
Difficulty:	easy	Fixed in Releases: 2.1.0
Triaged:	Yes	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/puppet-katello/pull/320	
Description		
<p>Currently the SSL version used to talk to the CDN can be set via <code>cdn_ssl_version</code>. This exists for proxies that don't support modern standards like TLS 1.2. In an ideal world these proxies wouldn't exist.</p> <p>It's used here:</p> <p>https://github.com/Katello/katello/blob/5f7f32ebf1f4a221b6c370ea2a15b733e18527b8/app/lib/katello/resources/cdn.rb#L64-L69</p> <p>The installer has a parameter for this:</p> <p>https://github.com/theforeman/puppet-katello/blob/1de6fedb0b8ccbeab024d754b5c678840676f77/manifests/init.pp#L131</p> <p>Since this is not critical to be set at installation time and can actually be a runtime setting, a database Setting would be a better place.</p>
