<b>Pull request:</b>	<a href="https://github.com/foreman/foreman/pull/7473">https://github.com/foreman/foreman/pull/7473</a>	

#### Description

Cloned from [https://bugzilla.redhat.com/show\\_bug.cgi?id=1756991](https://bugzilla.redhat.com/show_bug.cgi?id=1756991)

#### Description of problem:

When creating a template with 2 inputs with the same name, the error "uninitialized constant #<Class:0x00000000b894c38>::NonUniqueInputsError" appears and the operation fails. No traceback in production.log. Failure is expected but it should be handled better: the message should be more user friendly and preferably, the check should be handled before submitting the form.

#### Version-Release number of selected component (if applicable):

Reproduced on Sat 6.6 snap 22.

#### How reproducible:

Deterministic

#### Steps to Reproduce:

1. Monitor -> Report Templates -> Create
2. Set name
3. Go to Inputs tab
4. Add input, name it "abc"
5. Add another input, name it "abc"
6. Submit

#### Actual results:

Error, operation failed

#### Expected results:

(Form not submittable because this is checked by Javascript before submission). Better error message.
