Pull request:		
Description		
As part of an SELinux related bugfix ⁰ , the default value of PULP_STATIC_ROOT has changed from /var/lib/pulp/static/ to /var/lib/pulp/assets/.		
In order to work with the pulpcore-selinux policy, pulpcore 3.0.1 installations need to:		
<pre>- define PULP_STATIC_ROOT environment variable before running the 'django-admin collectstatic' command.</pre>		
<pre>- define PULP_STATIC_ROOT in the systemd unit file for pulpcore-api</pre>		
This will not be necessary once pulpcore 3.2.0 is being used.
