<b>Pull request:</b>		

#### Description

Cloned from [https://bugzilla.redhat.com/show\\_bug.cgi?id=1761404](https://bugzilla.redhat.com/show_bug.cgi?id=1761404)

#### Description of problem:

User is not able to create or view locations when assigned a cloned role for "Organization Admin" even when its filters have "create location" field added by default.

#### Version-Release number of selected component (if applicable):

6.4.0

#### How reproducible:

100%

#### Steps to Reproduce:

Clone the "Organization Admin" Role shipped by satellite and assign it to a user.

Filters in the role for "Location" says that user should be able to create and view the locations.

User is assigned to the appropriate location.

#### Actual results:

User not able to see or create a location

#### Expected results:

User should be able to create a new location.

#### Additional info:

N/A

## History

---

### #1 - 02/14/2020 10:29 AM - Ondřej Ezr

- *Category set to Users, Roles and Permissions*
- *Difficulty set to medium*
- *Triaged changed from No to Yes*

### #2 - 03/12/2020 01:17 AM - Ondřej Ezr

- *Status changed from New to Rejected*

This problem appears only if we assign the newly cloned role to some locations. The user is then able to manage only those locations and thus can't create new.

This seems to be a correct behavior ATM, it's just bad UX. Thus closing.
