Pull request:	https://github.com/theforeman/community-templates/pull/705		

Description

[SAT-E-459]

- As a user, I want to be able to generate Entitlements report (introduced in 6.7) and filter on subscriptions and subscription expiration date
- The report should take input of a duration (# of days) and only display subscriptions expiring in that amount of time.
- The report should list both expiring subscriptions and the hosts attached to them.
