Fixes #29049 - filter images & extends projects in GCE (#7463)

appends Google extra global projects list with 'rhel-sap-cloud' project to show images as Google compute engine.

Also, adds a method to filter the image list from

google compute by adding image family names to filter list.

- Subject changed from GCE should not display deprecated images while creating image to GCE should not display deprecated images while creating image

Along with the fix, I have extended global projects lists from Google Compute Engine with project "rhel-sap-cloud" and added method "image\_families\_to\_filter" to override so that I can override the behaviour.
