Refs #29069 - Install pulpcore-selinux if needed

To work around PUP-2169, the selinux contexts need to be present before the main Puppet run. Because pulpcore-selinux depends on python3-pulpcore, the foreman-installer-katello package can't depend on it.

This should be cherry picked into 2.0.0-rc3. Also needs an additional fix to install pulpcore-selinux before starting the main installer run.
