Can you share which OS and which repositories are enabled?

#2 - 03/02/2020 03:06 PM - Elias Pereira

For sure!! Sorry for my lack of attention in not putting this information before!!

OS: centos7

Repo:

<https://yum.puppet.com/puppet6-release-el-7.noarch.rpm>

<http://dl.fedoraproject.org/pub/epel/epel-release-latest-7.noarch.rpm>

https://yum.theforeman.org/releases/nightly/el7/x86_64/foreman-release.rpm

OS: centos7

Repo:

<https://yum.puppet.com/puppet6-release-el-7.noarch.rpm>

<http://dl.fedoraproject.org/pub/epel/epel-release-latest-7.noarch.rpm>

https://yum.theforeman.org/releases/nightly/el7/x86_64/foreman-release.rpm

The lack of packages has been fixed by installing the repository below:

```
yum -y install centos-release-scl-rh
```

I follow the wiki instructions. Perhaps it is necessary to update the wiki with this repository?

#4 - 03/02/2020 07:38 PM - Ewoud Kohl van Wijngaarden

Which wiki instructions? They should probably be removed and link to <https://theforeman.org/manuals/1.24/index.html#2.Quickstart>

<https://theforeman.org/manuals/nightly/index.html#2.Quickstart>

selecting the centos option.

<https://theforeman.org/manuals/nightly/index.html#2.Quickstart>

selecting the centos option.

Quickstart didn't provide this repo, but in the <https://theforeman.org/manuals/1.24/index.html#3.3InstallFromPackages> informs to install. My mistake, guys!! I'm Sorry!!!

Maybe put this repo on the quickstart tutorial? :D
