Revision 29fe60a8 - 03/04/2020 03:16 PM - Adam Ruzicka

Fixes #29258 - Initialize dynflow in puma workers

When running puma in clustered mode in production, Dynflow would get initialized in the master process before workers were forked off and due to CoW the workers would use the same world id.

With this commit we will eagerly initialize Dynflow only when running under Passenger. When running under puma, we will initialize Dynflow in workers.
