

Foreman - Bug #29265

Does not load datacenter when multiple compute resources are created for same VCenter

03/04/2020 04:35 PM - Ondřej Ezr

Status: Closed	
Priority: Normal	
Assignee: Ondřej Ezr	
Category: Compute resources - VMware	
Target version:	
Difficulty:	Fixed in Releases: 2.1.0
Triaged: No	Found in Releases:
Bugzilla link: 1785683	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/7489	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1785683	
Description of problem: Does not load datacenter when multiple compute resources are created for same VCenter	
Version-Release number of selected component (if applicable): foreman-1.22	
How reproducible:	
Steps to Reproduce: <ol style="list-style-type: none">1. Create a Compute resource for the Vcenter having multiple Datacenter2. Click test connection and connection will be successful and will load the Datacenter.3. Again try to create new computer resources for the same Vcenter.4. once clicked on the Test connection, it is successful but not able to load the Datacenter list	
Actual results: Test connection successful but data centers are not listed when multiple compute resource are created for same VCenter	
Expected results: It should load datacenters list after test connection is successful.	
Additional info: This is most likely because of the cache on the datacenters list, as it gets cached under empty CR id.
