Foreman - Refactor #29292

deprecate per_page_options and move its logic to Pagination component

03/08/2020 05:23 PM - Amir Fefer

Pull request:	https://github.com/theforeman/foreman/pull/8152		

Description
we don't use per_page_options anywhere else (expect Pagination component), and since we already read the per_page url parameter in the pagination, it makes sense to move the logic of calculating the options into the component instead of app_metadata in application helper

Revision 8bff4054 - 12/02/2020 06:03 PM - Tomer Brisker

Fixes #29292 - Move pagination options to the client (#8152)

- Fixes #29292 - Move pagination options to the client

There is no need to send the pagination options from the server, they
can be generated on the client side.

- Refs #29292 - fix review comments

Renamed PaginationHelper to PaginationHooks and removed test that is no
longer needed.

- Refs #29292 - Remove useless pagination options from audit table

The pagination component already gets the pagination options and doesn't
need them to be passed in from the calling component.
