Description

ubuntu 16.04 and 18.04 NO_PUBKEY error during ansible plugin installation

```
sudo foreman-installer --enable-foreman-plugin-ansible --enable-foreman-proxy-plugin-ansible
```

Provides the following error message during the apt installation of ansible-runner and does not install ansible-runner because of missing public key.

Ubuntu 16.04:
Err:8 https://releases.ansible.com/ansible-runner/deb xenial InRelease
The following signatures couldn't be verified because the public key is not available: NO_PUBKEY D430849D3DD29021

Ubuntu 18.04:
Err:9 https://releases.ansible.com/ansible-runner/deb bionic InRelease
The following signatures couldn't be verified because the public key is not available: NO_PUBKEY D430849D3DD29021

Workaround:

```
sudo apt-key adv --keyserver keyserver.ubuntu.com --recv-keys D430849D3DD29021
```

- Status changed from New to Resolved

We have since packaged ansible-runner in our own repositories so this is no longer an issue.
