Fixes #29445 - restrict STI deletion to admin (#7694)

When obsolete STI records deletion was introduced, we allowed even non-admin users to delete that. This patch makes it possible only for admins to delete records from the database. Non-admin users only see a short message explaining what happened, that they should contact administrator and request ID that can help administrator to figure out what happened.

It was also necessary to add explicit require_login call, otherwise User.current was nil in case the stack failed before user was loaded. This also made the page looks much nicer, because the menu can be properly rendered.
