Status: Closed	
Priority: Normal	
Assignee: Marek Hulán	
Category: Templates	
Target version:	
Difficulty:	Fixed in Releases: 2.1.0
Triaged: No	Found in Releases:
Bugzilla link: 1814752	Red Hat JIRA:
Pull request: https://github.com/foreman/foreman/pull/7559 , https://github.com/foreman/community-templates/pull/715	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1814752	
Description of problem: When running the playbook "Configure Cloud Connector", when entering parameters, there is text input "satellite_password". It's not hidden in asterisks, it's plaintext. Users usually expect password fields to be of type password, not text.	
Version-Release number of selected component (if applicable): 6.7 snap 16, NOT regression	
How reproducible: Deterministic	
Steps to Reproduce: 1. Hosts -> Job Templates 2. Run template Configure Cloud Connector 3. Start typing in field satellite_password	
Actual results: The entered password is visible	
Expected results: The entered password is hidden as passwords usually are

Revision 5059cd45 - 04/03/2020 01:49 PM - Marek Hulán

Fixes #29464 - plain inputs can be hidden

Some inputs can be sensitive. Users typing such values would prefer to have the value hidden in the form. The sensitive information can be a password, private key or general multiline text. Therefore we aren't limiting the input to type=password, but use text area with hiding font, similarly to what we do for parameters.

Revision 6203de0e - 04/03/2020 01:54 PM - Marek Hulán

Refs #29464 - hide the password value in CCC playbook

History

#1 - 04/02/2020 07:52 PM - Marek Hulán

- Tracker changed from Bug to Feature

- Assignee set to Marek Hulán

This is a generic request to make sensitive inputs hidden in the form, shared for all kind of templates that accept user inputs
