

Foreman - Bug #29467

ACE Editor instances have a massive drift between blinking cursor and actual insertion point

04/03/2020 10:44 AM - Harald Linden

Status: Duplicate	
Priority: Normal	
Assignee:	
Category:	
Target version:	
Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Setting to replicate:	
<ul style="list-style-type: none">• Foreman 1.24.2• Katello 3.14.1	
Client:	
<ul style="list-style-type: none">• Ubuntu 18.04 with standard Gnome-Desktop• Firefox 74.0• Chromium 80.0.3987.149	
Problem: The further right a cursor is in a line, the less accurate the position of the cursor vs. the actually edited position. This is off by several characters in a <80 chars line. See attached screencast. This affects Chromium and Firefox as clients.	
Expected behaviour: Insertion should happen where the cursor is blinking.
