Pull request:	https://github.com/theforeman/smart-proxy/pull/757			

Description
URLs are common settings and the Proxy should provide validation out of the box for this.

Revision 8b27dabf - 04/11/2020 04:03 PM - Ewoud Kohl van Wijngaarden

Fixes #29468 - Add default URL validator for plugins

URL settings are common and this moves it from a custom validator in the
Puppet module to a default. Also adds tests and ensures the dhcp and dns
libvirt providers use it too.
