One commit was merged into Foreman 2.1.0 but this is still open since it was Refs. Can it be closed or is there still work remaining?

Yes, I believe so, many improvements were merged since then, I remember Tomer and Leos had touched that and I believe with Rails 6.2 we were forced to do it properly.

So if everything works with Rails 6.2, lets close.

Setting fixed in release on 3.4, but 3.3 would be more appropriate for sure, but it is already closed release.
