Target version:	
Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases: 1.24.2
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>I've discovered a host (In this case a virtual box VM) and it shows all it's details correctly the n viewing through the "Discovered Hosts" UI. However clicking "Provision" and then "Customise Host" in the pop-up, I'm redirected to an opps page with the following error:</p> <pre>undefined method `datepicker_f' for #<#<Class:0x00000000184b5a10>:0x000000001674db30> Did you mean? datetime_f</pre> <p>Full stack trace attached. Installed packages attached.</p> <p>I have the following plugins enabled:</p> <pre>foreman-tasks 0.17.5 foreman_discovery 16.0.1 foreman_expire_hosts 7.0.0 foreman_hooks 0.3.16 foreman_monitoring 1.0.1 foeman_openstack 2.0.2 Foreman_remote_execution 2.0.8 katello 3.14.1</pre>	

History

#1 - 01/30/2023 02:00 PM - Ewoud Kohl van Wijngaarden

- Status changed from New to Rejected

I believe this comes from the foreman_expire_hosts plugin and is tracked in https://github.com/theforeman/foreman_expire_hosts/issues/69/
