<b>Description</b>		
<p>The moving of functionality from the foreman_ipam plugin, into a widget in Foreman core(as per <a href="#">@Lukas Zapletal</a> request).</p> <p>The design/layout has been modified from that of the original plugin to accommodate the widget's smaller real estate. Both the Groups list(on left) and subnets list(on right) are scrollable, and strings are truncated to avoid text wrapping. Some screen shots are attached</p>
