

Foreman - Bug #29570

Permission 'create_{organization,location}' has restrictions for org/loc creation

04/20/2020 12:38 AM - Ondřej Ezr

Status:	New

Pull request:		

Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1825698

Description of problem:

Role with permission 'create_location' or 'create_organization' doesn't allow creation of Org/Loc if it has assigned Orgs or Locs.

Version-Release number of selected component (if applicable):

Satellite 6.6

How reproducible:

Always

Steps to Reproduce:

1. Create role with 'create_location'/'create_organization' perm
2. Assign the role Organization and Location
3. Assign the role to a user
4. Try to create organization

Actual results:

You don't have permission create_locations with attributes that you have specified or you don't have access to specified locations or organizations

Expected results:

Organization should be created OR the error message should be more specific, for the user to know what to do.

Additional info:

This is expected as the role is scoped to given Taxonomy, but the created Loc/Org is not within the assigned Taxonomy. But as a user, I'd be really confused about this and didn't know what to do.
