Foreman - Bug #29591

Efibootmgr_netboot assumes bash is used.

04/22/2020 09:41 AM - Ben ter Haar

Pull request:	https://github.com/theforeman/community-templates/pull/719		

Description

During testing with debian deployment on EFI hosts, we noticed that the /tmp/finish.sh throws an error: in-target: /tmp/finish.sh: 325: /tmp/finish.sh: [[: not found. This is caused by provisioning_templates/snippet/efibootmgr_netboot.erb which uses double brackets when testing for efi. Replacing the test cases with single brackets will make efibootmgr_netboot compliant with sh.

The fix for this has been pushed into develop branch, however fixing this in the stable branches should be considered. I've attached a patch based on 1.24-stable which fixes the issue. Please let me know if you need anything else.

Revision 4c11d052 - 04/22/2020 01:57 PM - Ben ter Haar

Fixes #29591 - Replaced the double bracket testing to builtin test

Depending on the active shell, the efibootmgr_netboot snippet will throw
an error in the finish.sh script like
/tmp/finish.sh: 325: /tmp/finish.sh: [[: not found
