Description
When searching for a variable or parameter in a template with CTRL+F the search only covers the currently visible part of the template, it should search in the whole template

- Found in Releases 2.3.0 added

The search functionality doesn't work in foreman 2.3, too. Did you already recognize this?

Currently I see, that the search functionality in the templates editor is completely unusable. No search box is even shown.

I tried:
- to add ace-builds so that "import 'ace-builds/src-min-noconflict/ext-searchbox';" works. Issue "ace.require is not a function" see
https://github.com/securingsincity/react-ace/issues/722
- to replace react-ace with https://www.npmjs.com/package/react-ace-builds - search box is still not shown.

Currently to work around a user can open the ace editor in full screen and then the browser search works there. (using the maximize button)
