| Description | | |
| We're getting dinged by security auditors to stop using IPMI, and some of the features we want to use (boot media in particular) don't work across all vendors (HPE and Dell in particular). Implementing a Redfish provider for the BMC Smart Proxy would solve these problems, and potentially open the door to integrating additional BMC function. | | |

Associated revisions

Revision f94a7f19 - 12/04/2020 01:31 PM - R. Stricklin

Fixes #29636 - Add BMC support for Redfish.

Includes changes to enforce BMC provider selection for front-end tasks. Previously, all Foreman UI requests to the BMC smart proxy used the proxy's default provider, regardless of BMC NIC setting.

Revision c24cf7f8 - 12/07/2020 03:20 PM - Lukas Zapletal

Refs #29636 - fix BMC test failures
