

Foreman - Bug #2972

Incompatibility with jsonp and bundler_ext support

08/26/2013 04:45 PM - Steven Bambling

Status:	Closed	
Priority:	Low	
Assignee:	Dominic Cleal	
Category:	Packaging	
Target version:	1.6.0	
Difficulty:		Fixed in Releases:
Triaged:		Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/foreman/foreman-packaging/pull/471	
Description		
<p>I've seen the Foreman Versions 1.2.1.x and 1.2.0.x, when installing via packages from the RPM repository using SCL</p> <p>When enabling support_jsonp support via the foreman settings.yaml the rails app fails to start with an error complaining about the version of rails not being installed on the system. If set to false the foreman app starts without issue.</p> <pre>[root@puppet foreman]# sudo /etc/init.d/foreman start Starting foreman: /opt/rh/ruby193/root/usr/share/gems/gems/bundler-1.1.4/lib/bundler/resolver.rb:287:in `resolve': Could not find gem 'rails (= 3.2.13) ruby' in the gems available on this machine. Revision b273713e - 01/09/2015 10:16 AM - Dominic Cleal

refs #2972 - foreman requires jsonp, ship bundler.d/jsonp.rb

Since ~foreman was included recursively, swapped to a more explicitly layout to name the sub-dirs that are required in the RPM. This then allows us to pull in the empty bundler.d dir and specific files below it, instead of

excluding files that are in other sub-packages.

Steven,

in your bit I do see that you are using bundler and not bundler_ext. I do not understand what is wrong in this case. If you switch an RPM SCL installation to bundler, then just do bundle update/install as you wish but note we do not recommend that and the moment you switch to bundler you are not receiving our updates via RPMs anymore.

If you want to switch to JSONP and keep RPM SCL, I guess you need to install package named ruby193-rubygem-jsonp and then enable support there. If this does not work or the package does not exist that is another story and we need to fix that.

So what commands have you issued to get into this state?

#2 - 08/27/2013 07:30 AM - Dominic Cleal

Lukas, Steve's indeed using bundler_ext, but I think enabling :support_jsonp: true in settings.yaml is causing config/application.rb to then call Bundler.require which causes Bundler to launch and causes this issue.

#3 - 08/27/2013 03:12 PM - Lukas Zapletal

- *Category changed from Rails to Packaging*
- *Priority changed from Normal to Low*

Reproduced.

#4 - 06/11/2014 02:22 PM - Dominic Cleal

- *Status changed from New to Ready For Testing*
- *Assignee set to Dominic Cleal*
- *Target version set to 1.8.2*
- *translation missing: en.field_release set to 10*
