Description

Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1753206

Description of problem:
In Hammer, while generating "Applied Errata" report, I can't set input Status=all.
This is due to "all" not being explicitly set as a possible option in the report template. In WebUI, it's sufficient to leave the field empty while in Hammer, some of the options must ve selected, forcing the user to only select errata with specific status.

Version-Release number of selected component (if applicable):
Reproduced on Sat 6.6 snap 20.

How reproducible:
Deterministic

Steps to Reproduce:
1. # hammer report-template generate --id 113 --inputs 'Filter Errata Type'='all','Include Last Reboot'=yes
Input Status: Value is not included in the list
2.# hammer report-template generate --id 113 --inputs 'Filter Errata Type'='all','Include Last Reboot'=yes,Status=all
Input Status: Value is not included in the list

Actual results:
Must select one of the statuses, e.g. "success" or "warning"

Expected results:
Hammer shouldn't force me to filter errata by status
