

Foreman - Feature #3013

Add some sugar for template comparisons

09/02/2013 04:12 PM - Greg Sutcliffe

| Description | |
| Right now to test, eg, a hostgroup value, one has to use | |
| <pre><% if @host.hostgroup.to_s "Base/MyGroup" -%></pre> | |
| It would be nice to drop the to_s as it's ugly. We could add `` methods to the models, or maybe we could use the new object names patch? Joseph, what do you think? | |
