Description		
Foreman currently doesn't allow you to set the disk size of the VM you wish to provision instead it only allows the AWS default of 8GB. It would be useful to set the size of the VM during New Host creation.

- Hi,
- This is really something that renders EC2 integration nearly useless :/
- In the meanwhile, please find attached an updated patch to hardcode size to 20G...

The PR has been close by the bot due to no activity, looks like it just needs a rebase
