Foreman - Bug #3029

Edit_params permission does not grant enough rights to actually edit params in the web interface

Description

Hi,

I have created a role to allow users restricted access to view hosts and edit only the parameters of that host. However once logged in, there is no 'edit' button available to allow this action without also adding the 'edit_hosts' permission. Once this is granted that user have far more rights than I wish them to. I have not verified if the edit_params permission works 'stand-alone' through the API.

History
