

Foreman - Bug #3039

smart variable override doesn't work

09/06/2013 09:25 AM - Ronny M

Status: Resolved	
Priority: Normal

Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
Foreman 1.2.2	
If a smart variable is overridden in hosts parameters of an host with a new or different value, the value from the matcher rule is in the yaml instead of the value from the override.	
In the yaml below as "lv_layout: ext4" but should be lv_layout: ext5 as shown in attachment: smart_variable_override.png	
The overridden variable shows notfound instead of ext4 in the screendump but that is another bug that I logged as Bug #3033 .	

classes:	
test:	
parameters:	
puppetmaster: foreman.localdomain	
hostgroup: test	
root_pw: xybxa6JUkz63w	
puppet_ca: foreman.localdomain	
foreman_env: production	
owner_name: "Admin User"	
owner_email: "root@localdomain"	
global-param: test	
host-param: test	
lv_layout: ext4	
environment: production
