<b>Description</b>		
Foreman Proxy's HTTPBoot feature used to require tftp, but since Foreman Proxy 1.22 this is no longer true (commit:db33bc6780e28b5d694a1be6642e637aff59936f / <a href="https://github.com/theforeman/smart-proxy/commit/db33bc6780e28b5d694a1be6642e637aff59936f">https://github.com/theforeman/smart-proxy/commit/db33bc6780e28b5d694a1be6642e637aff59936f</a> ).

Fixes #30449 - Do not require TFTP for HTTPBoot

Since Foreman Proxy 1.22 the hard requirement on TFTP is no longer present. This changes the default to always be off, rather than on. This makes sense since in the default deployment HTTP is off and most installations don't support booting over HTTPS.

To get the netboot files, the TFTP feature must still be enabled.
