Description		
We need to update Passenger to 4.0.19 or similar. Glen's provided a spec file via #3197 .

I'm having some problems with this at the moment, same as those I hit last time I tried to update to .10.

The agents have moved from agents/ in the build dir to buildout/agents/, and paths in lib/phusion_passenger.rb etc need updating to handle it, else Passenger fails to start as it can't launch the agent process. There's a sed expression in the spec file that's meant to change these, but I think the variables it tries to replace are out of date.

I'd prefer not to move them to buildout/agents/ in the resulting RPM as this will break the SELinux fcontexts as they expect only agents/.

Will test the new 4.0.18 RPM built for F20, as a code inspection looks like it might have the same problem. If not, it might be a good example to use for how to fix it.

Not to update them only for this release or forever?

Forever ideally, "buildout/" is just a dir from the build process, it shouldn't be visible in the final package.

Glen Ogilvie wrote:

One problem, you'll need to correct in that spec, is that when it tries to compress 3 of the man pages, it fails because they are already there as part of the build I think.

You'll see, when you are testing. Feel free to diff it with the original.

#6 - 10/16/2013 03:58 PM - Greg Sutcliffe

- Target version deleted (1.4.0)

#7 - 02/25/2014 02:46 PM - Dominic Cleal

- *Blocks Tracker #4447: Support installation on RHEL 7 added*

#8 - 04/22/2014 03:49 PM - Dominic Cleal

- *Status changed from Assigned to Closed*

- *Target version set to 1.8.4*

- *% Done changed from 0 to 100*

- *translation missing: en.field_release set to 4*

Updated in nightly to 4.0.18 to match RHSC 1.1. I'll push down into 1.5 and probably 1.4 in due course.

#9 - 05/07/2014 10:10 AM - Dominic Cleal

- *translation missing: en.field_release changed from 4 to 17*

#10 - 10/15/2018 01:47 PM - Tomer Brisker

- *Category changed from 21 to Packaging*
