Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request: https://github.com/theforeman/foreman/pull/3272	
Description	
Some Settings involve selecting from a list of data from elsewhere in Foreman. For example the Default Hostgroup plugin requires the user to select a Hostgroup to default to.	
Currently these Settings are a text field, which allows the user to specify incorrect data. It would be better if a Setting could state a dynamic list (say, Hostgroup.all) to allow the user to select from.

Revision ad603e40 - 05/06/2016 07:33 AM - Amir Fefer

Fixes #3200 - Add select boxes to settings

Fixes #3200 - Add select box to settings

Sometimes it necessary to choose a value from a collection of values, instead of entering a raw value.
