

Foreman - Feature #3220

API for "rendered" view of host parameters, taking into account inheritance

10/08/2013 04:57 PM - Dominic Cleal

Status: New	
Priority: Normal

Category: API	
Target version:	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
From #3111 :	
What would be extremely useful for hosts, is a way to return a smart parameter, like if rendering kickstart templates or externalNodes: /api/hosts/myhost/parameters/myparam would then return the host parameter myparam, if not set the hostgroup parameter myparam, if not set the operating system parameter myparam, if not set the common parameter myparam.
