

## Foreman - Bug #32388

### Host detail - user without power\_hosts permissions sees spinner in all host view

04/22/2021 08:56 AM - Ondřej Ezr

<b>Status:</b> Resolved	
<b>Priority:</b> Normal	
<b>Assignee:</b>	
<b>Category:</b> Inventory	
<b>Target version:</b>	
<b>Difficulty:</b>	<b>Fixed in Releases:</b>
<b>Triaged:</b> No	<b>Found in Releases:</b>
<b>Bugzilla link:</b> 1801630	<b>Red Hat JIRA:</b>
<b>Pull request:</b>	
<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1801630">https://bugzilla.redhat.com/show_bug.cgi?id=1801630</a>	
<b>Description of problem:</b>	
TLDR: look at attached screenshot and fix spinner.	
When nonadmin user opens All hosts, instead of power icon there is spinner, that's okay, but after the response from server come, spinner should stop. Right now it spins forever.	
Api call bellow says you don't have enough permissions to see power icon. (okay but spinner should stop)	
<pre>curl --request GET --insecure --user &lt;user&gt;:&lt;password&gt; https://&amp;lt;satellite&amp;gt;/api/v2/hosts/&amp;lt;hostname&amp;gt;/power { "error": {"message":"Access denied","details":"Missing one of the required permissions: power_hosts","missing_permissions":["power_hosts"]} }</pre>	
Not sure if it possible, but please can you look if something similar can occur also with another entities with some roles for dynamic loads in ui (ie. spinners)	
<b>Version-Release number of selected component (if applicable):</b>	
satellite 6.7 snap 10	
<b>How reproducible:</b>	
Always	
<b>Steps to Reproduce:</b>	
AS ADMIN:	
0. Do not forget to use same organization and location for role, user, host.	
1. Create role with Filters: 'Organization': ['view_organizations'], 'Host': ['view_hosts']	
2. Create non admin user with attached role.	
3. Create host/ existing host should be enough ( I don't try it)	
AS NEW USER:	
4. Log in as new user -> All hosts, spinner	
<b>Actual results:</b>	
Power spinner spins forever.	
<b>Expected results:</b>	
I would expect empty place as you can see in model, host group, last report or actions.	
<b>Additional info:</b>	
I can give you an instance of satellite with this setup.
