#### Description

Cloned from [https://bugzilla.redhat.com/show\\_bug.cgi?id=1806459](https://bugzilla.redhat.com/show_bug.cgi?id=1806459)

#### Description of problem:

If you have Organization or Location with 2 or more words like (Default Organization or Default Location). GoTo Hosts -> All Hosts -> Select/Click a host to see details. On the left-hand detail box, click Organization name (Default Organization) or Location name (Default Location).

This will take you to the Hosts -> All Hosts page with search query but the query is incorrect so you will see no hosts.

query formed is as below

~~

organization = Default Organization

~~

#### Version-Release number of selected component (if applicable):

Foreman 1.24

#### How reproducible:

Always

#### Steps to Reproduce:

1. Select the host in "Default Organization"
2. Click the host to see detail page
3. Click on the Default Organization

#### Actual results:

Wrong search query formed as a result no hosts is shown.

~~

organization = Default Organization

~~

#### Expected results:

Search query should be

~~

organization = "Default Organization" ----> In Quotes

~~

#### Additional info:

This works fine in Satellite 6.6

## Associated revisions
