<b>Description</b>	
It would be good if tabs on new Host detail page could be accessed by URL. The appropriate tab would be active based on the URL when the page is loaded. Something like:  /hosts/my-host.example.com -> default to overview tab /hosts/my-host.example.com/overview -> overview as well /hosts/my-host.example.com/foo -> foo tab active  The main use case is that content of the page would be URL addressable. We could redirect to a specific tab and display relevant section rather than showing always the overview.
