Pull request:	https://github.com/theforeman/foreman/pull/8495, https://github.com/theforeman/foreman/pull/8649, https://github.com/theforeman/foreman/pull/8738, https://github.com/theforeman/foreman/pull/8769		

Description

It would be good if tabs on new Host detail page could be accessed by URL. The appropriate tab would be active based on on the URL when the page is loaded. Something like:

/hosts/my-host.example.com -> default to overview tab
/hosts/my-host.example.com/overview -> overview as well
/hosts/my-host.example.com/foo -> foo tab active

The main use case is that content of the page would be URL addressable. We could redirect to a specific tab and display relevant section rather than showing always the overview.
