<b>Pull request:</b>	<a href="https://github.com/foreman/foreman/pull/8473">https://github.com/foreman/foreman/pull/8473</a>	
<b>Description</b>		
<a href="https://github.com/foreman/foreman/blob/develop/app/views/api/v2/config_reports/show.json.rabl">https://github.com/foreman/foreman/blob/develop/app/views/api/v2/config_reports/show.json.rabl</a> should also include the origin		
The same should be probably displayed in the list, UI shows the icon there too.

Fixes #32427 - API should expose report origin

The UI shows icon with a tooltip identifying the configuration report origin. API should also expose that information so people can tell from the list of reports and the detail of the report, what subsystem this report came from.
