<b>Description</b>		
The issue is that node v10+ doesn't support spdy, and it's not possible in webpack-dev-server v2 the pass the correct option in order to disable h2, on newer webpack-dev-server versions this issue is resolved

Fixes #32437 - Use webpack-dev-server-without-h2

Looks like webpack-dev-server version 2.x can't support https without http2 due to missing options when using command line parameters, this is an hack that will prevent manually removing a line after each `npm install` and will give us some air while trying to upgrade to webpack 5.
