Triaged:	No	Found in Releases:
Bugzilla link:		Red Hat JIRA:
Pull request:	https://github.com/theforeman/puppet-for-eman_proxy/pull/664	
Description		
ansible-runner upstream used to provide Debian packages, and while the old repository is still available, it's not updated anymore.		
we (theforeman) have a build based on the Debian.org packages that will be in Debian 12 (not 11 :) which we can use in the meantime

Revision a8794fe2 - 04/28/2021 02:29 PM - Evgeni Golov

Fixes #32442 - use own ansible-runner packages on Debian

ansible-runner upstream used to provide Debian packages, and while the old repository is still available, it's not updated anymore.

we are now building our own packages, so let's switch to those

this will also clean up the old repo from the system, if it was managed before
