

Foreman - Bug #32452

The host registration form uses host group names which don't contain parent names

04/29/2021 09:38 AM - Marek Hulán

Description Host groups can be nested. Showing only the hostgroup name e.g. "centos" may not be enough to identify the exact hostgroup. In host group index we use the full name (including parents names), e.g. "base/centos" or "base/centos/puppet/openscap". We should use these full names in the registration form too.	

Associated revisions

Revision 96c60e9c - 05/20/2021 11:29 AM - Leos Stejskal

Fixes #32452 - Host Registration tweaks and improvements (#8519)

- Updated ApiPie documentation
- Fixed typo in `default_host_init_config_template` setting
- Snippet `host_init_config_post` moved at the end of the `host_init_config` template, where it should be, not before `insights` snippet
- Use `title` instead of `name` for host groups and operating systems
- Updated list of variables in `global_registration` template
