<b>Description</b>	
In Ubuntu 20.04 the tftp directory was changed from /var/lib/tftpboot to /srv/tftp (matching Debian's default again). There is no automated way to migrate the files and the installer can do this.

For now i added:

```
sed -i 's/\srv/tftp/\var/lib/tftpboot/g' /etc/default/tftpd-hpa
systemctl restart tftpd-hpa.service
```

to my install script
