#### Description

Ansible callback doesn't run because the file is not executable

Version-Release number of selected component (if applicable):

Satellite 6.8

How reproducible:

Create a virtual machine via image based

Steps to Reproduce:

1. Create a new virtual machine
2. Select the Image Based
3. Check the file created '/root/ansible\_provisioning\_call.sh' with permission 0644 (should be 755)

Actual results:

The file created has permission 644 and the tower callback will not start (doesn't run).

Expected results:

The file '/root/ansible\_provisioning\_call.sh' should be executable and tower callback works.
