Pull request:	
Description	
<p>When playing around with the rest api I missed the feature to retrieve a list of all puppetclasses with their respective ids.</p> <p>So, I alter the file app/controllers/puppetclasses_controller.rb to include a method to retrieve a json object with all classes with their ids.</p> <pre>def all @puppetclasses = Puppetclass.find(:all, :select => "id, name", :order => 'id').to_json render :json => @puppetclasses end</pre>	
<p>Then, in the router.rb file I add:</p> <pre>map.connect "/puppetclasses/all", :controller => 'puppetclasses', :action => 'all'</pre>	
<p>I am not a big ruby expert, so I don't know if this is the best approach... :)</p>
