<b>Description</b>	
<p>Bootstrap script should be only returned when bootstrap parameter is present regardless if host is found or not, because it can be actually found by a HTTP proxy REMOTE_IP fallback mechanism and bootstrap would be never returned.</p> <p>Second problem is in global template handling, it should be only returned when host was not found but there wasn't mac argument provided.</p> <p>More info at: <a href="https://community.theforeman.org/t/foreman-2-4-katello-4-ipxe-not-working/23398">https://community.theforeman.org/t/foreman-2-4-katello-4-ipxe-not-working/23398</a></p>
