Pull request:	
Description	
<p>Whenever a user accesses a page in the Katello UI, they are doing so within the context of an organization. That organization is currently stored in the user's session.</p> <p>As Katello moves towards becoming an engine, the support for current_organization needs to be altered.</p> <p>The following are a few initial things that need to be done:</p> <ul style="list-style-type: none">- katello organization needs to become an extension of the core (foreman) organization- current_organization should probably be determined from foreman's Organization.current
