fixes #3261 - use the action the host is about to perform for power action notifications

History

#1 - 10/15/2013 05:11 PM - Dominic Cleal

- Subject changed from Foreman 1.3 stable: Error when powering off an vmware VM from webUI to Message shows wrong power state when powering off an VM from webUI

- Description updated

- Priority changed from High to Normal

Indeed, it's reporting the current state of the machine after it's finished the API call rather than the target state. If the hypervisor triggers a soft shutdown, then the VM will still be "on" rather than "off", even though it's beginning shutdown. The message reported will have no effect on the power off itself.

#2 - 10/15/2013 05:17 PM - Peter Gustafsson

Yes but it's confusing the users, they then hit the power off button once more and get an error message.
I would rather see a message telling that the host is shutting down.

Br, Peter
