

Foreman - Feature #3272

Separate internal admin account from user admin accounts

10/16/2013 08:29 AM - Dominic Cleal

Status: Closed	
Priority: Normal	
Assignee: Dominic Cleal	
Category: Authentication	
Target version: 1.6.0	
Difficulty:	Fixed in Releases:
Triaged:	Found in Releases:
Bugzilla link:	Red Hat JIRA:
Pull request:	
Description	
<p>Currently we install a default "admin" account which is used both for internal+anonymous actions, and the first user's login. This account can't be deleted as we need it for the former.</p> <p>This use should be separated by hiding the internal admin account, then have the user either set up a new account for themselves during installation or first access.</p> <p>We can then permit the user to delete all but one admin accounts (and except our hidden one).</p>

History

#1 - 11/12/2013 01:06 PM - Anonymous

- Target version set to 1.10.0

#2 - 11/22/2013 09:54 AM - Dominic Cleal

This must include having a user-selected or randomised password for the first admin account.

#3 - 11/22/2013 10:04 AM - Dominic Cleal

- Related to Feature #3725: Make default root password more explicit and configurable at install time added

#4 - 11/25/2013 04:47 PM - Dominic Cleal

- Assignee set to Dominic Cleal

#5 - 11/25/2013 05:59 PM - Dominic Cleal

- Blocked by Refactor #3752: Move all data addition in DB migrations into a seed script added

#6 - 12/04/2013 01:11 PM - Dominic Cleal

- Target version changed from 1.10.0 to 1.9.3

#7 - 12/16/2013 07:20 PM - Dominic Cleal

I requested some feedback on foreman-dev to work out how the first user account should be populated:

https://groups.google.com/forum/#!topic/foreman-dev/8v53KusW_gw

The consensus seemed to be:

- accept the initial admin password as an installer parameter, allowing it to be specified on the command line and answers file
- randomise the admin password if it's not given, and force the user to reset it on first login
- print the admin password after install

#8 - 01/09/2014 02:17 PM - Anonymous

- Target version deleted (1.9.3)

#9 - 02/27/2014 06:50 PM - Benjamin Papillon

- Related to Bug #2108: Cannot delete or rename admin user via GUI added

#10 - 02/28/2014 10:49 AM - Dominic Cleal

- Related to Feature #2128: There should be a post-installation screen to setup the initial username and password when login is enabled added

#11 - 03/03/2014 01:20 PM - Anonymous

- Target version set to 1.9.0

#12 - 03/25/2014 10:07 AM - Dominic Cleal

This is in progress on <https://github.com/domcleal/foreman/tree/3272-admin-account>, and I hope to have it up for review in sprint 22.

The main areas still to work on are: randomising the admin password via the installer and the db:seed script, ensuring admin-enabled user groups interact properly with the changes, and possibly a forced password change when the randomised password is first used.

#13 - 03/26/2014 01:02 PM - Dominic Cleal

- Target version changed from 1.9.0 to 1.8.4

#14 - 04/24/2014 12:05 PM - Dominic Cleal

- Target version changed from 1.8.4 to 1.8.3

#15 - 05/13/2014 10:39 AM - Dominic Cleal

Please merge in the following order.
