

Foreman - Bug #32732

api request to bulk/destroy,

06/07/2021 08:44 AM - Ondřej Pražák

Status: New	
Priority: Normal	
Assignee:	
Category: API	
Target version:	
Difficulty:	Fixed in Releases:
Triaged: No	Found in Releases:
Bugzilla link: 1942399	Red Hat JIRA:
Pull request:	
Description Cloned from https://bugzilla.redhat.com/show_bug.cgi?id=1942399	
Description of problem: When api request to bulk/destroy with same list in included and excluded parameter is sent, I would expect operation to pass with no operation done. If the behaviour is correct please change the error message.	
Version-Release number of selected component (if applicable): 6.9 snap 16	
How reproducible: Always	
Steps to Reproduce: Request https://&lt;hostname&gt;/api/v2/hosts/bulk/destroy with options {'auth': ('<user>', '<password>'), 'verify': False, 'headers': {'content-type': 'application/json'}}, no params and data {'organization_id': 80, "included": {"ids": [26, 27, 28]}, "excluded": {"ids": [26, 27, 28]}}. Response nailgun.client - WARNING - Received HTTP 403 response: {"displayMessage": "Action unauthorized to be performed on selected hosts.", "errors": ["Action unauthorized to be performed on selected hosts."]}	
Actual results: Error message that don't make much sense.	
Expected results: Success, but no action. Or improved error message.	
Additional info: Not a regression. SatelliteQE can modify the test_positive_bulk_destroy test to easily verify this.
