

## Foreman - Bug #32792

### Compute profile references wrong datacenter path after changing datacenter name

06/12/2021 02:30 PM - Ondřej Ezr

<b>Status:</b> Closed	
<b>Priority:</b> Normal	
<b>Assignee:</b> yifat makias	
<b>Category:</b> Compute resources - VMware	
<b>Target version:</b>	
<b>Difficulty:</b>	<b>Fixed in Releases:</b> 3.1.0
<b>Triaged:</b> Yes	<b>Found in Releases:</b>
<b>Bugzilla link:</b> 1946120	<b>Red Hat JIRA:</b>
<b>Pull request:</b> <a href="https://github.com/theforeman/foreman/pull/8668">https://github.com/theforeman/foreman/pull/8668</a>	
<b>Description</b>	
Cloned from <a href="https://bugzilla.redhat.com/show_bug.cgi?id=1946120">https://bugzilla.redhat.com/show_bug.cgi?id=1946120</a>	
When changing the name of the datacenter compute profiles still reference the old path, seen in the api here:	
Result of GET <a href="https://foreman.example.com/api/v2/compute_resources">https://foreman.example.com/api/v2/compute_resources</a>	
description :	
url : vCenter.example.com	
id : 4	
name : vCenter_Name	
provider : VMware	
provider_friendly_name : VMware	
user : vcenter_login	
datacenter :	
server : vcenter.server.example.com	
set_console_password : True	
caching_enabled : True	
But the compute profiles associated with the updated compute resource are still using the old datacenter path of /Datacenters/<old name>/vm (which no longer exists):	
From GET <a href="https://foreman.example.com/api/v2/compute_profiles/6">https://foreman.example.com/api/v2/compute_profiles/6</a>	
id : 12	
name : 2 CPUs and 2048 MB memory	
compute_resource_id : 4	
compute_resource_name : vCenter	
provider_friendly_name : VMware	
compute_profile_id : 6	
compute_profile_name : Base OS	
vm_attrs : @{cpus=2; corespersocket=1; memory_mb=2048; firmware=bios; cluster=i-linux-cluster01;	
resource_pool=Resources; path=/Datacenters/<old name>/vm; guest_id=rhel7_64Guest;	
scsi_controller_type=ParaVirtualSCSIController; hardware_version=Default;	
memoryHotAddEnabled=0; cpuHotAddEnabled=0; add_cdrom=0; annotation=; interfaces_attributes=; volumes_attributes=}	
Correcting the resource only requires editing the profile and submitting the profile again and the path is fixed, no direct changes are necessary, it is annoying anyway.
